Accelerate your digital transformation with Fluxygen

Are you facing these common obstacles in your digitalisation journey?

- Fragmented systems
- Manual effort
- Technical complexity
- High costs

Fluxygen

Fluxygen's solution: Simplifying integration

Integration doesn't have to be difficult! Fluxygen transforms complexity into manageable tasks by connecting systems, processes, and people through its intuitive iPaaS platform.

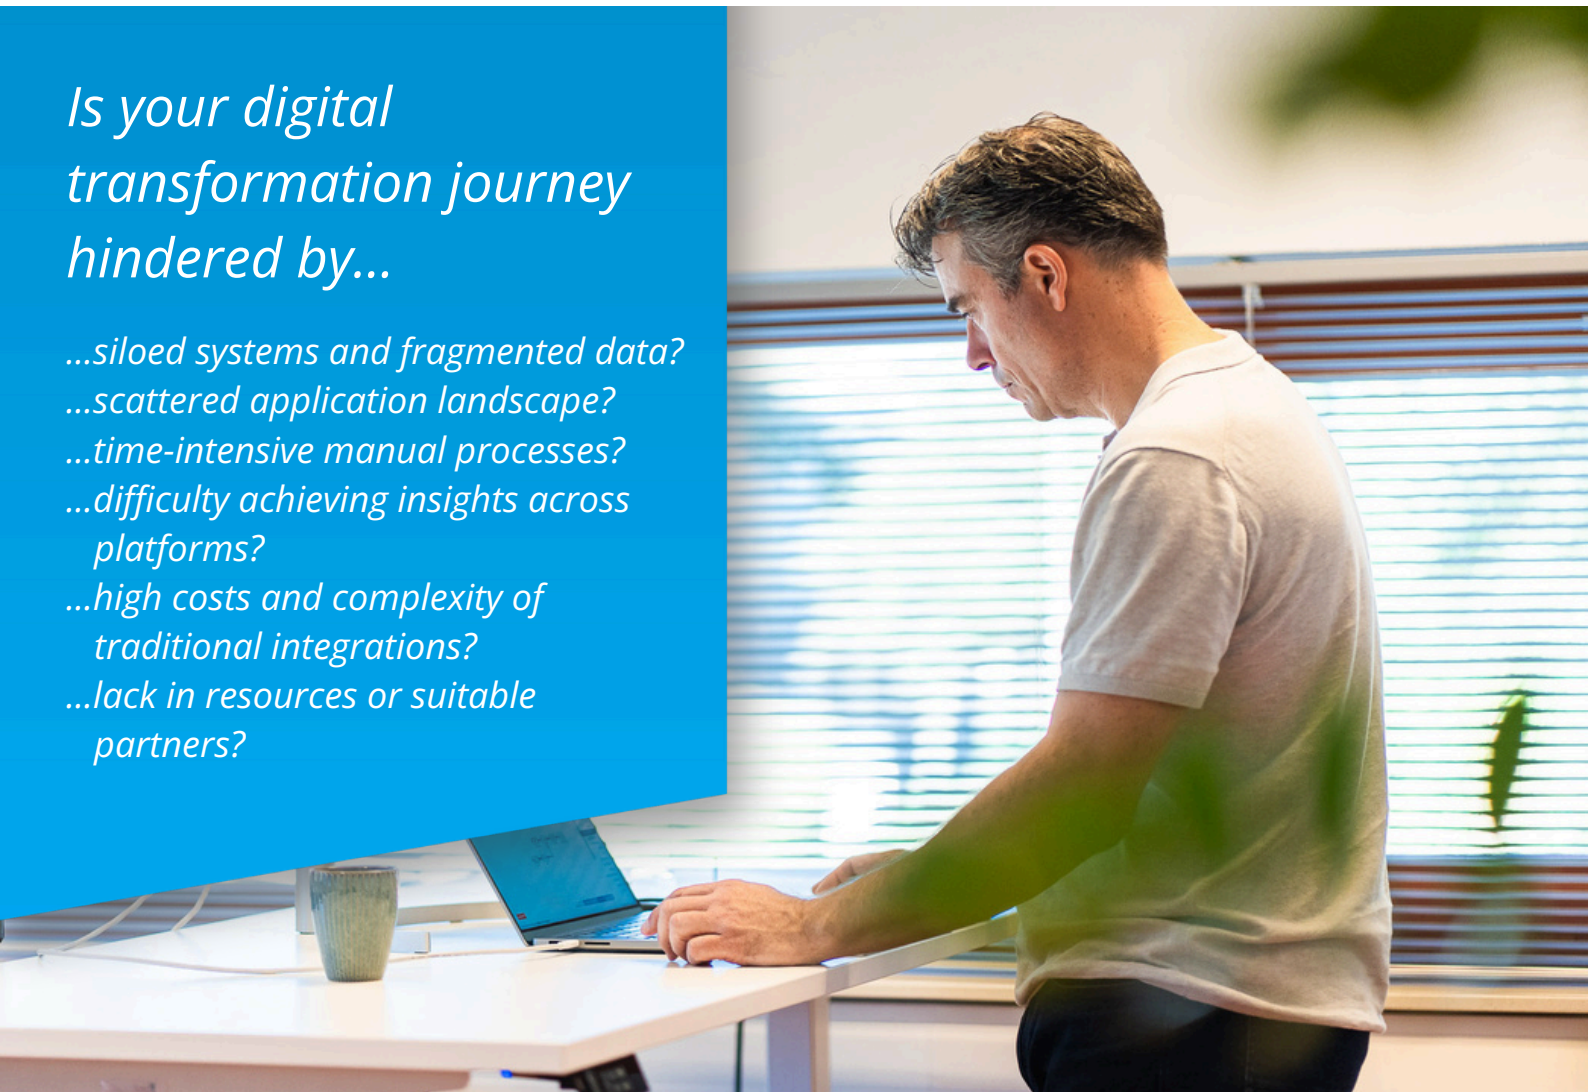

How does Fluxygen work?

1. **Connect:**   Seamlessly link applications via APIs or other open protocols
2. **Map:**   Use the drag-and-drop interface to align and organize the data flow
3. **Translate:**   Transform data into usable formats
4. **Optimise:**   Monitor, debug, and refine workflows with real-time visibility

Is your digital transformation journey hindered by...

...siloed systems and fragmented data?
...scattered application landscape?
...time-intensive manual processes?
...difficulty achieving insights across platforms?
...high costs and complexity of traditional integrations?
...lack in resources or suitable partners?

Align technology, processes and people

Digitalisation is not just about implementing the most technically advanced application; it is a holistic process that requires the right combination of organised processes, active stakeholder engagement and technology.

A technical solution, like Fluxygen's iPaaS, ensures the capability to integrate (complex) systems efficiently. However, true success lies in structuring workflows to align with your business goals and ensuring clear communication among teams to support adoption.

With a visual drag-and-drop interface, pre-configured integration components, and a focus on usability, Fluxygen makes technology accessible while laying the groundwork for organised and efficient processes.

Our partner network brings the confidence and expertise to navigate this journey. By combining their domain knowledge, industry-specific insights, and technical proficiency, our partners ensure that users feel supported at every step, from mapping out integration needs to optimising ongoing workflows. This collaboration allows businesses to approach digitalisation with peace of mind, knowing they have the guidance to overcome technical and organisational challenges effectively. Whether it's addressing specific industry requirements or providing hands-on assistance, our partners are there to empower users to achieve seamless integration with ease.

Empowering your digitalisation journey with trusted partners who bridge processes, people and technology.

Features you'll love

Ease of use with no-code technology

Fluxygen's intuitive drag-and-drop interface empowers users with limited technical expertise to build and manage integrations. By eliminating the need for programming knowledge, it makes complex workflows accessible to IT professionals and citizen developers alike.

Comprehensive and cost-effective solution

Fluxygen provides all the tools you need for seamless digitalisation in a single platform. Its competitive pricing ensures a quick return on investment by reducing integration development time by up to 75%.

End-to-end visibility and control

The Flow Manager allows users to monitor, debug, and refine workflows in real-time. From building to managing integrations, every step is designed for transparency and efficiency.

Supportive partner network

Fluxygen's robust network of expert partners offers tailored guidance, ensuring businesses navigate their integration journey confidently. This partnership combines domain knowledge with hands-on support for every stage of digitalisation.

Scalability and security by design

Built on Apache Camel and employing enterprise-grade integration protocols, Fluxygen scales effortlessly with your business while ensuring your data and integrations are secure and reliable.
